# Welcome to the Osher Lifelong Learning Institute at West Virginia University (OLLI at WVU)

Welcome to OLLI's winter 2023 term!

Since we're writing this letter in early November, it's difficult to predict what January, February, and March may bring. Cold temperatures, warmer temperatures, snow, rain, sunny skies? All are possible. Regardless of the weather outside, you will find inspiration and insight in the OLLI classrooms this winter. With over 60 lectures, workshops, discussion groups, and adventures, the winter schedule offers members the opportunities to explore their creativity, expand their knowledge, and exercise their brains and bodies.

Earlier this fall, we asked our current and past members to share through a survey some information about themselves and their course preferences, as well as provide feedback on some OLLI services. Demographic information was collected at the request of the Osher Lifelong Learning Institute National Resource Center to help OLLI administrators and advisory boards, nationally and locally, identify who we are serving and who we need to work a little harder to reach.

Other information will be used to help OLLI at WVU identify our strengths and weaknesses while creating educational and social opportunities of interest to our members, friends, and stakeholders. Our Board of Directors, Board of Advisors, and committees will review the results of the survey over the next couple of months and begin to develop plans and programs to grow desired opportunities and address member concerns.

Thank you to the WVU students who helped develop and launch the survey and analyze the information collected. And thank you to everyone who shared with us by completing the survey.

If you did not have an opportunity to complete the member survey but would like to share your thoughts about OLLI at WVU and lifelong learning opportunities in West Virginia with us, we invite you to visit <https://bit.ly/3NyrDNZ> or scan the QR code to the right to do so.

Many of us have multiple demands on our time and a variety of leisure-time activities to choose from. We hope that you will choose to include OLLI at WVU among those activities this winter. Whether in-person at one of our locations in Morgantown or the Kanawha Valley or on Zoom, we have a seat for you.

If you've never taken an OLLI class, call our office at 304-293-1793 to ask about a one-time introductory guest pass.

### Registration & Attendance Matter

We understand that plans change, especially when you're asked to commit to something several weeks in advance. However, it is important to register for the classes that you wish to attend. Enrollment records help us demonstrate our members' active participation in the program when seeking funding from grant-makers and policy-makers. Also, we occasionally have classes which fill quickly so one that you wish to attend may already have a waiting list.

If you are unable to attend a class for which you are registered, please notify the OLLI office at 304-293-1793 or email [olli@hsc.wvu.edu](mailto:olli@hsc.wvu.edu). Another person may be anxiously awaiting your cancellation so that he or she may participate in the class.

Please be respectful of the time and efforts of our volunteer instructors and your fellow OLLI members.

Israel, Palestine, and the history of that Holy Land has provided film directors with plenty of material. *Exodus*, filmed by Otto Preminger in 1960, was a now classic and honest attempt to portray the history of the founding of Israel after the end of the British control of Palestine. It deals with real issues on both sides of the struggle, acted out by a stellar cast including Paul Newman, Eva Marie Saint, Ralph Richardson, Peter Lawford, Lee J. Cobb, Sal Mineo, John Derek and George Maharis. Dalton Trumble, a black-listed writer, wrote the screenplay from Leon Uris's popular novel. 208 minutes.

Kenton Colvin\*

Thursday, Jan. 19, 12:45 - 2:30 p.m.

After more than two centuries of democracy, Americans are conditioned to expect a politician who loses an election to gracefully surrender his office to the winner. When John Adams (Federalist), after a close and bitter election for U.S. president peacefully ceded power to Thomas Jefferson (Republican), it marked an important precedent-setting moment in the young republic. In the 18<sup>th</sup> century, it was almost a rule that political parties were dangerous and undesirable. This course focuses on the 1800 election and the impact of exploding party politics.

Mention royalty, think Elizabeth II, at least in today's world, given her historic tenure, but the Japanese monarchy, like its English equivalent, also retains an enduring presence. Beyond such similarities as religious role--crown and Christianity, emperor and Shintoism--there have been stark differences: a lack of scandal, transparency and gender opportunity in Japan. This two-part class will center on Japan's monarchy, its survival in the ashes of World War II and its redefinition in an increasingly democratic society, largely unsympathetic to its continuation.

### American Chestnut: the Demise and Rebirth of an Iconic Species

Jim Rentch

Wednesday, Feb. 8, 10:00 - 11:45 a.m.  
Zoom & Morgantown B

The American chestnut once dominated portions of the eastern U.S. forests. It was among the largest, tallest, and fastest-growing tree in these forests. Its wood was rot-resistant and suitable for furniture, fencing, and building materials. Its nut fed insects, birds, and mammals and was a significant cash crop for rural families. This changed during the early 20<sup>th</sup> century with the introduction of a deadly blight from Asia. In 50 years, the blight ended the Chestnut's presence as an overstory tree. However, the species is not extinct, and efforts to develop a blight-resistant tree are now becoming a reality along several fronts.

They crawled on and in the bottom ooze of ancient oceans and occupied all levels of the food chain as predator, scavenger and prey. Trilobites displayed remarkable evolutionary adaptation to their environment. Three states have designated a trilobite as the state fossil.

Red spruce forests once ranged over a million acres in the high elevation areas of West Virginia. They housed a unique ecosystem of plants, animals, climate, and soils that were distinct from those common to the state's lower-elevation deciduous hardwood forests. However, in the time span of about forty years, these magnificent forests virtually disappeared into the sawmills and pulpmills during the logging boom, 1880-1920. This talk will cover red spruce biology, its former and current range, and its unique flora and fauna. It also will describe current steps to restore this former ecosystem.
